QUOTE DATE

23 Oct 2021

QUOTE TO

Salazar & Rosello

Name	Quantity	Price	Subtotal
Basic Interior View - 3D floorplan	1	450	450.00
Basic Exterior Perspective View of the Entry	1	500	500.00

TOTAL: \$ 950.00
DEPOSIT DUE: \$650

1 General Terms

1.1 We start working on the project the next business day after the deposit is paid.

1.2 The first stage of the rendering process is collating all information regarding the project and creating a 2-way presentation with the design specification. If an item from the necessary information is missed it may cause the delay in starting the modeling/rendering process.

We need to have information like: elevations, furniture layout, furniture samples, material and color selection, site plan, roof plan

1.3 After the customer has approved the presentation all following work on the said project will be done according to those specifications.

1.4 Any messages before or after the specification has been approved will no longer be valid. Work will only be done according to the agreed upon provided and approved.

1.5 Applet 3D is not responsible for any delays in turnaround which arise as a result of delayed or no response during the information collation and approval phase on the customers part.

Things that may cause the delay of the project:

Absence of drawings or inaccurate drawings (elevations differ from floorplans, some dimensions are omitted)

Design specification provided by photo references, without the spec sheet with links to furniture items with dimensions or.

Custom textures (eg. wallpaper, tile, etc) provided by bad quality photos or without the links to manufacturers.

1.6 3D Rendering working stage will be started after the customer approves the specification only.

1.7 The quote includes free two rounds of changes, markups or comments, any and all additional rounds will be charged with a \$25 per hour fee.

1.8 Usual turnaround for changes 1-2 days.

1.9 The final rendered product we will be providing are High Quality still images in any requested format (.jpg, .tif, .png or .pdf). The standard resolution of the image is 3000*2400 pxl 300 dpi. This resolution can be printed and enlarged up to dimensions of 24"H*48"W.

* Things that can also influence the usual timing of the project:

Delayed feedback (when the feedback is given later than in 1-2 days)

Submitting comments via phone/zoom call. In this case, the project manager has to provide the client with the list of comments in writing to approve, which takes additional time.

Custom furniture modeling (if there are no such furniture/accessories models in 3d library)

Absence of particular design (multiple incongruous reference; Please be clear and explicit on which designs or elements you want applied from the references)

Dusk settings

Complex topography site plan

2 Exterior Terms

2.1 Usual turnaround for a small single-family house is 3-4 days for the initial rendering of 1 view.

2.2 If the quote does not include any special lighting effects (i.e. dusk, evening, daylight etc.) it can be done for an extra fee

2.3 If the quote does not include urban surrounding modeling it can be done for an additional fee.

2.4 If the quote does not include custom modeling for landscaping then it can be done for an extra fee.

3 Interior Terms

3.1 Usual turnaround for a simple room is 3 days for the initial rendering of 1 view. The larger room is, the longer the turnaround will be.

3.2 The models of furniture, lamps, decorative objects, etc. will be taken from 3D libraries.

3.3 If the quote does not include custom modeling of furniture, lamps, decorative objects, etc. then it can be done for an extra fee.

4 Payment Terms

4.1 Payments are divided into two parts, the first 70% needs to be paid before the project starts, the second 30% (balance) needs to be paid before final renderings are done.

4.2 The final rendering will be sent *only* after the balance is paid.
